Sample Task:

Read the text and match each paragraph (A-E) with the correct heading (I-VIII) in the table by choosing the correct option for questions 11-15. There are three extra headings. (5x1=5 points)

A _____

Although intelligence and the brain have been studied for a long time, there is little understanding of how the brain works to produce intelligence. This has something to do with the fact that the brain contains around 100 billion cells (about the number of stars in the Milky Way).

B _____

One of the continuing myths about the relationship between intelligence and the brain is that the brains of very clever people are somehow physically different from those of ordinary people. At the beginning of the century, an American scientist called E.A. Spitzka produced a list of the weights of the brains of important, well-known men. The heaviest brain on the list was that of Turgenev, the Russian novelist, at 2000 gr. However, the brain of another great genius, Walt Whitman, weighed only 1282 gr.

C _____

There are no significant differences between the intelligence levels of males and females. However, girls under seven score a little higher than boys in IQ tests and Marilyn vos Savant has the highest IQ recorded. Yet, men and women differ in the way they think. Generally, women are more skilled orally and men do tasks better after they see them.

D _____

Also, there are similarities between the brains of all people and computers. Computers can do complicated calculations at unbelievable speeds. But they work in a fixed way because they can't make memory connections. In fact, it is claimed that when it comes to seeing, moving and reacting, no computer can even compete with the brain power of a fly.

E _____

Most of our mental acts are deeply formed habits. Challenging your brain to do things differently helps it develop. Try changing routines as often as you can: take a bus instead of going by car, sit in a different chair. Exercise more. Good health and fitness levels gives you improved energy. Cooking is also good for mental exercise. It challenges memory and gives creative ability. Finally, don't forget to do puzzles and play games.

HEADINGS			
I.	A Shocking History	V.	The Super Machine
II.	The Battle of the Sexes	VI.	Is Bigger Better?
III.	Which Is More Important: IQ or EQ?	VII.	Make Your Brain Work
IV.	How Much Do We Know?	VIII.	Technology and Health

11. The correct heading for paragraph A is _____.

- a) I b) II c) III d) **IV**

TASK II - Sentence Insertion (5 points)

Sample Task

Five sentences have been removed from the text below. For each question (16-20), choose the correct option (I-VIII). There are three extra sentences which you do not need to use. (5x1=5 points)

When a film is successful, it's usually the actors who get all the attention in the media, but at the Oscars this is different. The actors are just one part of what makes a film successful. Behind the scenes there is a hard-working team that makes it all happen. **16)** _____.

One of the most important people behind the scenes is the director. The director's job is to give directions to the actors and the film crew. **17)** _____. A director needs to work closely with lots of other people behind the scenes.

All films need good photography to help develop the story. **18)** _____. He or she makes sure that the photography supports the story. He or she has a lot of responsibility and leads the teams in charge of lighting and cameras.

19) _____. He or she is the person who needs to understand exactly what the director wants and design the most suitable costumes. The costumes have to be comfortable so the actors can move easily, but at the same time they need to match the characters the actors are playing. It's a job that requires imagination, research and you have to know how to make things!

It could be said that the most important person in the creation of a film is the producer. Without a producer there would be no film at all! The producer steers the film through all its stages. **20)** _____. During the whole filming process, it is the producer's job to make sure that everything goes well.

SENTENCES	
I. As the person who finds the money to finance the whole film, he or she also works closely with many other people behind the scenes.	V. Another essential person that we often forget about is the costume designer – the person who designs what the actors wear.
II. They are just as important as the big stars, and the Oscars recognise many of these people who we never usually consider.	VI. Film making is not a job, profession, field or career.
III. Directing a film is very stressful work.	VII. However, he or she doesn't work alone.
IV. The cinematographer is the person who is in charge of shooting the film.	VIII. Designing film costumes is very different from the work of fashion designers.

16. The sentence that fits best gap 16 is _____.

- a) III b) I **c) VI** d) II

TASK III – Multiple Matching (5 points)

Sample Task:

Read the text below and choose the correct option for each question 21-25. (5x1=5 points)

Our lives change every time and we are never the same people as we were in the past. We get education, meet people, have a job or a family, so we change our preferences about our diet, interests and even career - in short, our life styles. I have four close friends and they have changed their life styles a lot.

JAMES

When I first met James, he was living with his best friend in a small flat. He was studying sports science, and he was interested in different kinds of sports. He was very careful about what he was eating, and always avoided high-calorie food. All of a sudden, he decided that sports are not his thing anymore and left college. He's now taking music and art classes. He even changed his diet and got on a lot of weight. He's not worried about his current appearance, because he found love of his life in one of those art classes, and they're planning to get married soon.

LEILA

When I first met Leila, she was living at home with her parents and doing a maths course at the local college. She had long dark curly hair and was engaged to a friend of mine called Ken. She was a really good tennis player, and cooked excellent steaks, too. Now Leila teaches maths at a local school, and she looks completely different: she has short fair hair. But she still plays tennis with her boyfriend Harry.

MIKE

When I first met Mike, he was living at home with his parents, and working in a bar. He didn't smoke (though everyone else in the bar did!) and he was engaged to a student called Zoe. I remember he was a very good footballer. Mike still works in that bar but as a boss now, and he lives in a nice family house with Zoe and their two young children. He's very busy, so I don't see him very often – but I'm sure he still plays soccer with his sweet little boys in the backyard.

ZOLTAN

When I first met Zoltan, he was working in a software company. He was living with his parents in a small flat in the city center. He was very fit and interested in sailing. It was a love at a first sight, but it didn't work out. I was very surprised when I learned that he quit his job. Now, he is working as a coach for a national sailing team. I'm happy for him because it's his dream job and passion. Now he travels a lot with his team to take part in sailing competitions all around the world.

21. Who isn't into sports anymore?

- a) James b) Leila c) Mike d) Zoltan

TASK IV- Reading Comprehension (5 points)

Sample Task:

Read the text and choose the correct option for questions 26-30. (5x1=5 points)

200,000 miles from the earth, the crew of the third manned mission to the Moon faced an astronaut's worst nightmare: an explosion on the spacecraft. It is the plot of the Oscar-winning film Apollo 13, but it is also a true story of survival against the odds.

A Was it doomed from the beginning? The scientists at Houston were in charge of getting the spacecraft to the Moon and back. They had scheduled for the April 1970 lift-off for 13 minutes after the 13th hour. They had also planned the moon landing itself for the 13th day of the month. For those who believe in bad luck, perhaps the only thing missing was a Friday. Scientists aren't supposed to be superstitious, though, and despite minor problems on lift-off, Apollo 13 started its journey.

B Two days into the mission, the three-man crew faced catastrophe. They had been carrying out routine checks when there was a loud bang. Warning lights were starting to flash furiously. Looking out into space, they could see a trail of gas - the spacecraft was leaking oxygen. They sent out a short message to the scientists back on Earth: "Houston we've had a problem here!" At first, they thought that a meteor had hit them, but they later found out that a short-circuit had caused an oxygen tank to explode. Whatever the cause, they knew there was no time to lose. Their electricity supply in the command module depended on that oxygen and pretty soon they will run out of both.

C The only solution was to *conserve* oxygen by moving from the command module into the lunar module - the section of the spacecraft that would have landed on the Moon. Now though, they were using it as a kind of lifeboat. With its own power supply, oxygen and water, the three men could survive in the lunar module and return to Earth. There was another problem though. In an enclosed space like a lunar module, the carbon dioxide the crew was breathing out was dangerous. The equipment to clear the air of carbon dioxide was only built for two people. Now it had to cope with three. Amazingly, crew managed to put together an adapter that reduced the carbon dioxide to a safe level.

D There was one final *obstacle*. The lunar module wasn't strong enough to re-enter the Earth's atmosphere, so the crew had to transfer back into the damaged command module. To everyone's relief, the crew of Apollo 13 splashed down safely in the South Pacific Ocean on April 17th. It was a space flight that would go down in history. Although the crew didn't land on the Moon, NASA still considers the mission a success. The Apollo 13 disaster was proof that their highly-trained astronauts could deal with anything that could go wrong.

26. The text is mainly about _____.

- a) the bad effect of the number 13
- b) an explosion on a spaceship
- c) the Oscar-winning film Apollo 13
- ☒ d) a journey to the Moon

SESSION III: SPEAKING SKILLS (20 points)
